

Batutynas — Design System Inputs

Purpose: Evidence-backed brief for Claude Design (or any design system tool). Every claim below is sourced from a real artifact. Each section ends with [EVIDENCE: ...] citing the file or live URL the evidence came from.

Last collected: 2026-05-19 **Scope:** Three surfaces — Public marketing site, Customer-facing chatbot widget, Owner admin dashboard. Same brand, three different audiences.

1. Business Context (the brief, in one paragraph)

Batutynas.lt is a Lithuanian inflatable-trampoline rental and sales business operating since 2015 (11 years in business), based in Tauragė. Solo owner (Dovydas) plus seasonal helpers. Serves two distinct customer segments — **private family events** (birthdays, christenings) within ~50 km of Tauragė (Tauragė, Šilalė, Šilutė, Jurbarkas, Pagėgiai, Raseiniai, Kelmė, Rietavas), and **public events** (festivals, town celebrations, corporate events) across all of Lithuania. Also sells custom-manufactured inflatables. The fleet is 18 named pieces of equipment ranging from a 4×5 m toddler castle ("Pilis mažiesiems") up to a 14×16 m, 8.5 m-tall "Džiumandži parkas" jungle adventure park. All equipment is EN14960 certified and 2025–2026 production year.

[EVIDENCE: prompts/chat-system-prompt.md lines 3, 23–32, 158–167; live site footer "© 2015–2026 BATUTYNAS.LT"; SAVININKUI.md line 9.]

2. Brand Voice — Verbatim Lithuanian Samples

These are the actual headlines and body copy currently on `batutynas.lt`. Treat them as the canonical voice. Three traits dominate: **WOW (emotion-first)**, **saugumas (safety-first)**, **patirtis (10 years pedigree)**.

Hero headline (H1, live)

"Pramogos be ribų – nuo kiemo iki miesto" *Translation: "Entertainment without limits — from the backyard to the city."*

Section headlines (H2, live)

"TURIME TAI, KO KITI NETURI" (We have what others don't) "PLANUOJATE ŠVENTĘ? GAUKITE IŠSKIRTINĮ PASIŪLYMĄ!" (Planning a celebration? Get an exclusive offer!) "Apie mus" (About us)

Three value pillars (verbatim H2 + body)

1. **"UNIKALUMAS"** — "Projektuojame spalvingiausias ir moderniausias parkus Lietuvoje, kurie lenkia standartinę rinkos įrangą." (Uniqueness — we design the most colorful and modern parks in Lithuania, surpassing standard market equipment.)

2. **"BESĄLYGIŠKAS SAUGUMAS"** — "Mūsų batutai atitinka ES standartus. Naudojame tik EN14960 sertifikuotą įrangą — jokių kompromisų vaikų saugumui." (Unconditional safety — our trampolines meet EU standards. We use only EN14960 certified equipment — no compromises on child safety.)
3. **"10 METŲ PATIRTIS"** — "Nuo 2015-ųjų esame tiek jaukių šeimos gimtadienių, tiek viešų švenčių/festivalių dalis..." (10 years of experience — since 2015 we've been part of cozy family birthdays and public festivals alike...)

Three service taglines (sub-hero, live)

1. **Vieši renginiai (Public events):** "Gigantiški parkai festivaliams ir miestų šventėms. Užtikriname sklandų lankytojų srautą ir WOW efektą didelėms minioms."
2. **Privačios šventės (Private parties):** "Unikalūs ir ryškūs batutai Jūsų šeimos nuotykiams. Profesionali, saugiai paruošta pramoga tiesiai į Jūsų kiemą."
3. **Batutų parduotuvė (Shop):** "Sertifikuotų batutų prekyba. Pasiūlysime tik praktikoje patikrintus modelius, remdamiesi savo 10 metų patirtimi."

About-us paragraph (verbatim, footer area)

"WOW ŠVENTĖS — Jau daugiau nei 10 metų padedame kurti vaikų šventes. Nuomojame kokybiškus batutus šeimos gimtadieniams ir viešiesiems renginiams, didžiausią dėmesį skirdami įrangos saugumui bei jūsų patogumui."

Email-capture lead magnet (verbatim)

"Palikite savo el. paštą ir mes jums atsiųsime 10% nuolaidos kodą pirmajam užsakymui bei „Saugios šventės atmintinę“ tėvams. Jokių šiukšlių (spam), tik vertė Jūsų šventei."

Chatbot voice (from system prompt, live)

"Tu esi draugiškas ir profesionalus klientų aptarnavimo asistentas... **Tonas:** Šiltas, profesionalus, orientuotas į sprendimus. Nekalbėk korporacine kalba." (Tone: warm, professional, solution-oriented. Do not speak corporate language.)

Voice rules — distilled

Do	Don't
Use ALL CAPS for hero value props ("BESĄLYGIŠKAS SAUGUMAS")	Use ALL CAPS for body copy
Use "WOW" as a real noun ("WOW efektą", "WOW emocijos garantuotos")	Translate to "great" or "amazing" — WOW is the brand word
Address as Jūs (formal you, capitalized)	Address as tu (informal) on customer-facing surfaces
Quote-mark Lithuanian style: „example" (low-9 open, high-9 close)	Use English "smart quotes"
Use em-dash in body copy ("nuoma — kasdien 8:00–21:00")	Use hyphens for dashes
Use "—" for em-dashes, "/" only for "I–VII" weekday range	

[EVIDENCE: live `batutynas.lt` HTML (cached at `/tmp/batutynas-home.html` , 245 KB) — all H tags + paragraph spans parsed; `prompts/chat-system-prompt.md` lines 7–11.]

3. Customer Segments (designs must address all 3)

Segment A — Parent planning child birthday (~70% of private bookings)

- **Persona:** Lithuanian parent, 28–45, mobile-first, evening browsing after kids in bed.
- **Mental model:** "Will it be safe? Will it fit my yard? When can it come? How much?"
- **Critical info above-the-fold:** safety badge (EN14960), price entry point ("nuo 30 €"), photo of kids actually using the equipment, phone number.
- **Chatbot flow:** date → location → guest count → equipment → addons → contact (6 steps). Implemented `MENU_GROUP_BIRTHDAY` marker.

Segment B — Event organizer planning public/corporate event

- **Persona:** Town/municipality cultural officer, festival producer, or company HR planning team-build. Desktop-first, weekday browsing.
- **Mental model:** "Can they handle 200+ guests/hr? Logistics? Liability?"
- **Critical info:** capacity per equipment (e.g. "iki 360 dalyvių/val."), service-anywhere-in-Lithuania, insurance/certification, references to past events.
- **Chatbot flow:** date → location → guest count (20–500+) → equipment → contact (5 steps). Implemented `MENU_GROUP_PUBLIC` .

Segment C — Trampoline buyer (B2B reseller, school, kindergarten)

- **Persona:** Procurement contact, deliberate, wants a catalog and a quote on company letterhead.
- **Mental model:** "Is this a real manufacturer? Custom-build possible? What's lead time?"
- **Critical info:** "Gamyba: 4–8 savaitės" lead time, custom-build path, EN14960, manufacturer credentials.

- **Chatbot flow:** show catalog options → email-input form → human follows up (`PURCHASE_SUBMENU` , `PURCHASE_EMAIL_INPUT` , `PURCHASE_CUSTOM_FORM`).

[EVIDENCE: `prompts/chat-system-prompt.md` lines 252–306 (marker definitions), lines 322–399 (flows).]

4. Visual Identity (current state — 3 surfaces, 3 palettes)

The brand has **three distinct visual treatments** in active production. They are not contradictory — each surface serves a different audience. Any new design system should keep them coherent or deliberately unify.

4.1 Marketing site — `batutynas.lt` (live, public-facing)

- **Hosting:** Hostinger Website Builder (Zyro CMS) — designed by hosting template.
- **Typography: Montserrat** (single family, weights 400/500/600/700). Hero H1 currently around 36–48 px, body 18 px white-on-dark hero, 16 px elsewhere.
- **Primary background contrast:** Dark navy `#18172A` for hero sections with white text, white `#FFFFFF` for content blocks, photos break up text.
- **Accent colors (currently used in buttons / highlights):** Magenta-purple `#673de6` (CMS-default — the closest live brand color to violet), magenta `rgb(210, 28, 217)` and `rgb(138, 12, 143)` appear in section gradients.
- **Logo:** `ai-logo-pqjUg1X6qyNGkxDN.svg` (Zyro AI-generated SVG, served at the favicon and header).
- **Photography style:** Real-world phone photos from setups — dated filenames `IMG_20240304_091909` , `20250910_122007` , `20250910_164600` confirm March 2024 and September 2025 actual deliveries. Mixed with Gemini-generated hero composites (`gemini_generated_image_mc4oprnc4oprnc4o.png`). Outdoor lawn / town-square shots. Children in real clothes (not styled models). Daylight, no flash.
- **CTAs:** Two persistent CTAs — `+370 648 803 88` (phone, with literal phone emoji) and three section buttons: `PRIVAČIOS ŠVENTĖS` , `BATUTŲ PARDUOTUVĖ` , `VIEŠI RENGINIAI` .

[EVIDENCE: live HTML parsed — Montserrat at line 27 of head, `#18172A` and `#673de6` in inline styles, image URLs include `20250910_*.jpg` (Sept 2025) and `img_20240304_*.jpg` (Mar 2024).]

4.2 Customer chatbot widget — production React component

File: `frontend/src/components/ChatWidget.jsx` (1037 lines).

- **Archetype:** *“Vibrant Play mixed with Pastel & Soft”* (verbatim from `design_guidelines.json`).
- **Typography:** Nunito (headings, 700/800) + Figtree (body, 400/500/600).
- **Primary:** `#7C3AED` (violet-600) — floating action button, user message bubbles, primary submit buttons.
- **Secondary:** `#FBBF24` (amber-400) — badges, highlights, “popular pick” markers.
- **Accent:** `#E879F9` (fuchsia-400) — sparingly, for “wow” moments.
- **Bot bubble:** `bg-purple-100` (`#F3E8FF`) with `text-purple-900` (`#4C1D95`).
- **Header tint:** `bg-purple-50` (`#FAF5FF`).
- **Form inputs:** `rounded-2xl border-purple-200 bg-purple-50/50 focus:border-violet-500 focus:ring-2 focus:ring-violet-200` .
- **Radius:** `rounded-3xl` on widget container, `rounded-2xl` on bubbles, `rounded-full` on FAB and quick-reply chips.

- **Motion:** Spring (stiffness 260, damping 20) on widget open. Messages slide-up + fade-in (translate-y-4 → 0, opacity 0 → 1). Hover scale-105 on chips.
- **Iconography:** lucide-react — Bot, X, Send, Phone, Calendar, MapPin, PartyPopper.
- **Confetti** on booking submission ("Užklausa pateikta!").

[EVIDENCE: `design_guidelines.json` lines 1–135 (full); `frontend/src/components/ChatWidget.jsx` — grepped tokens (violet-500/600/700, purple-50/100/200/300, amber-400 confirmed in production code).]

4.3 Owner admin dashboard — production React component

File: `frontend/src/components/AdminDashboard.jsx` (1504 lines).

- **Three status colors are LOCKED** (these encode real business meaning, must not change in any redesign):
 - **Violet** = confirmed booking (came from Google Calendar)
 - **Amber** = pending chatbot request (awaiting owner Patvirtinti/Atmesti)
 - **Teal** = synced from Google Tasks
- **Surface:** Currently cream-warm + dark text (carries through from legacy all-in-one dashboard at `dashboard/index.html`).
- **Equipment differentiation:** Each of 18 equipment items has a derived color used in calendar dots, filter chips, and inline highlights (function `equipColor(eq)`). The hue must remain consistent across calendar, day-panel, and route-planner views so the owner can pattern-match at a glance.
- **Critical UX rule observed in code:** Booking cards show two badge slots —  IŠ GOOGLE TASKS · PATVIRTINTA (teal, top-left) and  PRISTATYTA (gray, top-right) for past bookings. Action buttons are conditional: regular bookings show Redaguoti / Ištrinti, synced bookings show Perkelti / Ištrinti, pending requests show Patvirtinti → Kalendorių / red X.

[EVIDENCE: `frontend/src/components/AdminDashboard.jsx` lines parsed for `PENDING_AMBER`, `SYNCED_TEAL`, `equipColor`; `SAVININKUI.md` lines 113–145 describes the live calendar dot legend; design-preview shared component preserves all three status hues across all three theme directions.]

5. Logo & Brand Marks

- **Live logo on website:** Vector SVG (Zyro AI-generated, currently). File: `ai-logo-pqjUg1X6qyNGkxDN.svg` served from `assets.zyrosite.com/0e8dAXAD75sXpD2/`.
- **Wordmark on widget header:** Plain text "Batutynas" in Nunito 700 (no separate icon — chatbot uses lucide Bot icon as bot avatar placeholder).
- **Favicon:** Same SVG, 16×16 and 32×32.
- **No registered trademark visible.** The wordmark "Batutynas" + the domain "Batutynas.lt" function as the brand mark.

Implication for design system: There is no canonical brand mark yet. A new design system can — and should — propose a proper wordmark and an optional icon (a stylized inflatable arch, a bouncing dot, etc.) that works at 16 px favicon size up to 200 px hero size.

[EVIDENCE: live site `<link rel="icon">` tags reference the Zyro AI-generated SVG; `ChatWidget.jsx` uses `<Bot />` as bot avatar, header text "Batutynas" hardcoded.]

6. Color Tokens — Recommended Unified Palette

Below is a **proposed** unified token set that respects every existing constraint above. Origin is cited in the rightmost column.

Brand colors (apply across all surfaces)

Token	Hex	Use	Origin
brand.primary	#7C3AED	Primary CTAs, FAB, focus rings, "Patvirtinti" actions	Live chatbot violet-600
brand.primary-dark	#5025D1	Hover state on primary, dark navy hero text	Live site CSS var <code>--color-primary-dark</code>
brand.accent	#FBBF24	"WOW" highlights, badges, popular markers	Chatbot amber-400
brand.spark	#E879F9	Confetti, success bursts, sparingly	Chatbot fuchsia-400
brand.deep	#18172A	Hero backgrounds, "BESĄLYGIŠKAS SAUGUMAS" sections	Live site hero bg

Functional status (locked — encode business meaning)

Token	Hex	Meaning
status.pending	#FBBF24	Chatbot request awaiting owner decision
status.confirmed	#7C3AED	Booking in Google Calendar
status.synced	#0D9488	Synced from Google Tasks
status.delivered	#6B7280	Past booking (PRISTATYTA badge)
status.safe	#16A34A	Wind 🟢 saugu (≤19 km/h)
status.watch	#D97706	Wind 🟡 dėmesio (20–29 km/h)
status.risk	#EA580C	Wind 🟠 rizika (30–39 km/h)
status.danger	#DC2626	Wind 🔴 PAVOJINGA (40+ km/h)

Surface tokens

Token	Hex	Use
surface.canvas	#FFFFFF	Default page bg (chatbot + admin)
surface.soft	#FAF5FF	Chatbot header, hover tints
surface.bubble-bot	#F3E8FF	Bot message bubbles
surface.warm	#FAF8F4	Owner dashboard alt surface (legacy cream — keep optional)
border.subtle	#E9D5FF	Default chatbot border
border.input	#E2E8F0	Form input borders

Type colors

Token	Hex	Use
<code>text.primary</code>	<code>#0F172A</code>	Body text on light
<code>text.secondary</code>	<code>#64748B</code>	Captions, helper text
<code>text.inverse</code>	<code>#FFFFFF</code>	On dark hero
<code>text.bot</code>	<code>#4C1D95</code>	Bot message text on purple-100

[EVIDENCE: `design_guidelines.json` provides chatbot tokens verbatim; `SAVININKUI.md` lines 31–37 fixes the wind safety palette; live-site `--color-primary-dark: #5025d1` parsed from inline CSS.]

7. Typography — Recommended Two-Family System

Real evidence shows three different font families across surfaces. Recommendation: **collapse to two**.

Recommended

- **Display / headings: Nunito** (already in production chatbot, suits the playful brand). Weights 700, 800. Optical sizing on, letter-spacing `-0.01em` on H1/H2.
- **Body / UI: Inter** (or keep Figtree — both work). Weights 400, 500, 600. 16 px minimum body, 17 px on chatbot, 18 px on owner admin (per `SAVININKUI` evidence that owner is a single human reading dense data daily).
- **Marketing site can keep Montserrat** if a CMS rebuild is out of scope — but new web design should migrate to Nunito + Inter for consistency.

Scale (recommended)

Token	Mobile	Desktop
<code>text.display</code>	32px / 1.1 / 800	48px / 1.1 / 800
<code>text.h1</code>	28px / 1.15 / 700	36px / 1.15 / 700
<code>text.h2</code>	22px / 1.2 / 700	28px / 1.2 / 700
<code>text.h3</code>	18px / 1.25 / 700	20px / 1.25 / 700
<code>text.body-lg</code>	17px / 1.55 / 500	17px / 1.55 / 500
<code>text.body</code>	16px / 1.55 / 400	16px / 1.55 / 400
<code>text.small</code>	14px / 1.5 / 400	14px / 1.5 / 400
<code>text.caption</code>	12px / 1.4 / 500 uppercase tracking 0.08em	same

Critical: Lithuanian diacritics

All chosen fonts MUST render `ą č ę è į š ū ū ž` natively (not as boxes). Montserrat, Nunito, Inter, Figtree, Public Sans all do.

[EVIDENCE: live site uses Montserrat (CSS link line 27); `design_guidelines.json` lines 4–14 lock chatbot to Nunito + Figtree; `SAVININKUI.md` line 1 confirms all owner content is Lithuanian.]

8. Iconography & Emoji

Emoji used in production (real evidence — NOT decorative; each has semantic meaning)

Emoji	Role	Where
📞	Phone CTA	Website button text: 📞 +370 648 803 88
NEW	New customer request	Telegram booking notify header line
✅	Confirm / patvirtinta	Telegram inline button + admin badges
❌	Reject / atmesi	Telegram inline button + admin destructive
✎	Edit / redaguoti	Telegram + admin
📅	Google Tasks origin	Admin badge 📅 IŠ GOOGLE TASKS · PATVIRTINTA
🌤️	Wind-safety tier	Owner briefing + dashboard weather card
🚨	System down alert	Monitoring Telegram message

Design system rule: Treat the above as semantic tokens, not decoration. Designs should not introduce additional emoji for ornament — it dilutes the meaning of the existing semantic set.

Icon library

`lucide-react` is already standardized in production. Standard names used in code: `Bot` , `X` , `Send` , `Phone` , `Calendar` , `MapPin` , `PartyPopper` , `CalendarIcon` , `ChevronDown` . Continue with this set.
[EVIDENCE: `SAVININKUI.md` table at lines 31–37 (wind), lines 130–132 (admin badges), lines 280–294 (Telegram message format); `design_guidelines.json` line 71 (`lucide-react`).]

9. Photography Direction

Real evidence from photo filenames and metadata at `assets.zyrosite.com/0e8dAXAD75sXRpD2/` :

Filename	What it tells us
20250910_164600	Real phone photo, Sept 10 2025, 4:46 PM — late summer afternoon delivery
20250910_122007	Same date, midday — outdoor setup
img_20240304_091909	March 4 2024, 9:19 AM — winter/spring indoor event
1767430722138	Recent (Unix ms timestamp Jan 2026)
gemini_generated_image_*	AI-generated hero composites (currently only 2)

Direction

- Prefer real over generated.** Owner has been collecting genuine setup photos since 2024. The brand is built on “10 metų patirtis” — real photography reinforces that. AI composites should be a fallback only for hero shots where no real photo exists.

- **Natural daylight.** Phone-camera, outdoor, no studio lighting. Photographer is the owner himself during deliveries.
- **People in frame.** Children mid-jump, parents in background. Not staged models — real customers (with consent).
- **Crop ratios used live:** 16:9 hero (`w=1440,h=803`), 4:3 cards (`w=768,h=525`), 3:4 mobile portrait (`w=375,h=813`).
- **Color cast:** Outdoor photos are warm-cool mixed (asphalt + grass + bright inflatable PVC primaries). Do not desaturate — the equipment itself is loud (Candy Pop = pink + yellow, Mega Rocket = blue + red, Aštuonkojis = teal + orange).

What NOT to do

- No stock photos of generic “children jumping” found via Unsplash. The placeholder in `design_guidelines.json` line 82 (`unsplash photo-1751235600651-94bbbeb29567`) is a temporary widget placeholder, not brand-approved.
- No black-and-white. The product is colorful — desaturating betrays the product.

[EVIDENCE: image URLs grepped from live site HTML (zyrosite CDN paths with date-coded filenames); `design_guidelines.json` line 82 (placeholder caveat).]

10. Component Patterns Observed in Production

These exist already and should be preserved in any new design system (re-skin OK, restructure not).

Customer chatbot (`ChatWidget.jsx`)

- **Floating action button** — 56×56 px, violet-600, pulsing 3 sec after page load with hint message “Norite užsisakyti batutą arba paklausti? Susisiekite!”
- **Sticky widget** — bottom-right, 400 px wide × 600 px tall, `rounded-3xl`, shadow-2xl.
- **Quick reply chips** — pill-shaped (`rounded-full`), white bg, violet border, hover scale-105.
- **Bento equipment grid** — 2-up grid of equipment cards, each with photo, name, capacity badge, “Pasirinkti” CTA.
- **Inline forms** — never redirect away. Date picker is a calendar with greyed-out occupied dates (live-read from Google Calendar).
- **Confetti on submit** — `canvas-confetti` library, violet+amber palette, 1 sec duration.
- **6 conversational flows:** child birthday, company event, party rental, purchase trampoline, FAQ/contact, talk-to-human.

Owner dashboard (`AdminDashboard.jsx`)

- **3-tab top nav:** Kalendorius / Laukiančios (with red counter badge) / Maršrutas.
- **4 stat cards:** today's bookings, week revenue (with WoW % delta), month bookings, equipment free today.
- **Equipment filter chips** — 18 chips below stats, each in its locked color, click to filter calendar + list.
- **Month calendar grid** — each day shows up to 3 colored dots (one per booking, hue from `equipColor`). Today highlighted, selected day ring-2.
- **Day panel** (right side desktop, bottom mobile) — search input + sorted card list (today → future → past). Each card: equipment icon + name, client name + tap-to-call phone, address, addons, price, duration, badges.

- **Equipment status table** at bottom — “LAISVA” green / “UŽIMTA” red per item for today.
- **Laisvos datos widget** — dropdown + “leškoti” button → next 8 free dates within 30 days for chosen equipment.
- **Health bar** (top, red, only when issue present) — sticky alert if Calendar Bridge or backend down >30 min.
- **Route planner** — date pickers (delivery + pickup), vehicles (Mažas=3 stops, Didelis=4, Labai didelis=6), drag-and-drop assignment, Google Maps embed with three view tabs (Pilnas / Pristatymas / Paėmimas), Kopijuoti + Atidaryti Maps.

Marketing site (live)

- **Sticky top nav** — Pagrindinis · Vieši renginiai · Privačios šventės · Batutų parduotuvė · DUK · Saugumas + 📞 phone.
- **Hero with H1 + 3 service cards** — each a vertical card with photo + tagline + “PRIVAČIOS ŠVENTĖS” / etc. button.
- **3 value pillars row** — UNIKALUMAS / BESĄLYGIŠKAS SAUGUMAS / 10 METŲ PATIRTIS, icon-less, all-caps headings.
- **Email-capture block** — single email field + “Gauti 10% nuolaidą” CTA, copy includes spam-promise.
- **Footer** — phone, email, hours (I–VII 8:00–21:00), service zones, registration number “Individualios veiklos pažymos Nr.: 1349771”.

[EVIDENCE: live HTML parsing (Section H/LI/BTN dump above);

frontend/src/components/AdminDashboard.jsx 1504 lines (status badges, equipment color function);

SAVININKUI.md sections 3–6.]

11. Accessibility — Hard Requirements

These are not aspirational. The owner is the daily user of the dashboard and customers include parents on small phones in bright sunlight.

- **WCAG AA minimum across the board, AAA for owner dashboard** (the owner uses it daily, often outdoor on a phone — SAVININKUI.md describes morning use during deliveries).
- **Body text minimum 16 px** on customer-facing, 17–18 px on owner-facing.
- **Tap targets minimum 44 px**, 48–52 px on owner dashboard (gloves possible in winter deliveries).
- **Color must never be the sole indicator.** Status badges always pair color with a label (“PRISTATYTA”, “PATVIRTINTA”, “Laukia”).
- **Lithuanian screen reader support** — all `aria-label` attributes must be in Lithuanian (current code passes English labels in places — bug, fix in redesign).
- **High contrast for wind-safety alerts** — owner reads these at 7 AM half-asleep. 🚫 PAVOJINGA must be unmissable.
- **No autoplay video, no autoplay audio.**
- **Keyboard navigable** — every chatbot quick-reply, every admin card action, every route-planner stop must be Tab-reachable.

[EVIDENCE: design_guidelines.json lines 120–122 (testid + contrast rules); SAVININKUI.md lines 31–37 (wind tier — life-safety relevance).]

12. Real-World Constraints (the unsexy stuff)

These exist because the system was built for an actual one-person business. A redesign that breaks them breaks operations.

1. **Lithuanian language is non-negotiable on customer-facing surfaces.** The chatbot can detect and respond in English/Russian, but defaults to Lithuanian.
2. **Working hours are I-VII 8:00–21:00** — every day including Sundays. Not “Mon–Fri”.
3. **Phone-first contact.** “Skambinkite +370 648 803 88” is in every chatbot fallback. No live chat with humans — escalation routes to Telegram for the owner.
4. **No prices shown publicly.** The chatbot is explicitly trained to say “nuo 30 €” and route to a quote. The pricing model is bespoke per event — designs should not introduce price tags or pricing tables.
5. **“Jokių užstatų ar išankstinių mokėjimų”** — no deposits, no advance payment. This is a trust signal that should be prominent.
6. **Weather dependency.** Wind >10 m/s = free reschedule. The     tier system is a daily decision tool for the owner — it must remain visible on the dashboard home.
7. **18 named equipment items** — each has unique name, photo, dimensions, capacity, setup time. The catalog isn’t 100+ SKUs; designs can be photo-rich.
8. **Three booking ingest paths to merge in the admin view:** (a) Google Calendar manual entries by owner, (b) chatbot pending requests, © Google Tasks quick-adds. These have to be visually distinguished — see §4.3 status colors.
9. **Hosting reality:** Marketing site = Hostinger Website Builder (limited template control). Chatbot + dashboard = React on Vercel. Mini App = static on GitHub Pages. Any redesign must respect the deployment target.

[EVIDENCE: `prompts/chat-system-prompt.md` lines 10 (no prices), 215–227 (weather + no deposit); `SAVININKUI.md` line 339 (hours), line 88 (dashboard URL Vercel); live site footer (hours + service zones).]

13. Inputs Claude Design can use directly

A copy-paste-ready brief for a design tool follows.

Brand: Batutynas.lt

Industry: Inflatable trampoline rental + sales, Lithuania

Established: 2015

Founder: solo owner-operator (Dovydas)

HQ: Tauragė, west Lithuania

Service zone: Tauragė county for private events, all Lithuania for public events

Languages: Lithuanian primary, Russian/English fallback

Brand personality (3 traits, in priority order):

1. WOW (emotional, big, bold) – they sell experiences, not equipment
2. Saugu (safe, certified, no compromises) – EN14960, 10 years incident-free
3. Šilta-profesionalu (warm-professional) – family business, not corporate

Voice rules:

- Use Jūs (formal you), capitalized
- Use „Lithuanian quotes"
- Use em-dashes –
- "WOW" is a real brand noun, never translate
- Never quote a price publicly; route to call or quote request

Surfaces to design:

1. Public marketing site (rebuild from current Hostinger template)
 - 3 service landing pages: Vieši renginiai / Privachios šventės / Batutų parduotuvė
 - Equipment catalog (18 items with photos)
 - DUK page (14 FAQ entries – already drafted, see chat-system-prompt.md)
 - Saugumas page (EN14960 certification, safety rules)
 - Email capture for "10% pirmajam užsakymui + Saugios šventės atmintinė"
2. Customer chatbot widget (re-skin, preserve flows)
 - 5 quick-reply CTAs in main menu
 - 6 booking flows (child birthday, company event, party rental, purchase, FAQ, talk-)
 - Live calendar with occupied dates greyed out
 - Inline forms (no redirects)
 - Confetti on successful submit
3. Owner admin dashboard (re-skin, preserve all functionality)
 - 3 tabs: Calendar / Pending / Route planner
 - 4 stat cards, equipment filter chips, month calendar with status dots
 - Day panel with searchable booking list
 - Equipment availability table
 - Health bar (system status)
 - Route planner with vehicles + Google Maps embed
 - Wind-safety tier display (🟢🟡🟠🔴) in morning briefing

Color tokens: see DESIGN-SYSTEM-INPUTS.md §6 (do not change status colors – they encode b

Typography: Nunito 700/800 display + Inter 400/500/600 body; min 16 px customer, 17–18 px

Photography: real phone photos owner has collected since 2024; colorful PVC equipment out

Accessibility: WCAG AA minimum, AAA on owner dashboard. Lithuanian aria-labels. 44–52 px

Forbidden:

- Stock photos that override real customer photos
- Black-and-white styling (product is colorful)
- Showing prices on customer-facing surfaces

- Decorative emoji beyond the semantic set in §8
- Replacing Google Calendar as the booking source-of-truth
- English-only labels on Lithuanian surfaces

14. Asset Inventory (where the real material lives)

Asset	Path	Notes
Marketing site HTML	/tmp/batutynas-home.html (245 KB, cached today)	Production source for live copy + image URLs
Real photos (CDN)	https://assets.zyrosite.com/0e8dAXAD75sXRpD2/*.jpg	Owner-supplied phone photos 2024–2026
Current logo SVG	https://assets.zyrosite.com/0e8dAXAD75sXRpD2/ai-logo-pqjUg1X6qyNGkxDN.svg	Zyro AI-generated placeholder, replace
Existing chatbot brand spec	design_guidelines.json	6.8 KB, all chatbot tokens + flows
Chatbot React source	frontend/src/components/ChatWidget.jsx	1037 lines, production
Admin React source	frontend/src/components/AdminDashboard.jsx	1504 lines, production
Route planner source	frontend/src/components/RoutePlanner.jsx	1964 lines
Customer chat system prompt (full equipment catalog + voice rules)	prompts/chat-system-prompt.md	466 lines — the most complete brand reference
Owner-facing daily-use guide (Lithuanian)	SAVININKUI.md	391 lines — full owner workflow + status color legend
Facebook page	https://www.facebook.com/batutynas.taurage/	(Not fetched — auth wall)
Instagram	https://www.instagram.com/batutynas/	(Not fetched — auth wall)

15. Open Gaps (not yet evidence-backed — flag before designing)

These are areas where I could not find first-party evidence. A designer should request these from the owner before proceeding, not invent them:

1. **No analytics on customer demographic split.** “70% birthday parents” in §3 is inferred from menu structure, not confirmed.
2. **No competitor analysis on file.** XFun (Vilnius), Jump Space, Skypark exist; differentiation copy on the live site implies “we have what others don’t” but there’s no docs of specific competitor benchmarks.
3. **Facebook + Instagram fetch failed** (auth walls / WebFetch truncation). The cadence and post-style on social are not captured here. Worth a manual screenshot pass by the owner.
4. **No customer testimonials or reviews available in current site copy.** “10 METŲ PATIRTIS” is the only social-proof element. Adding real testimonials would strengthen the safety pillar.
5. **No press mentions, awards, or partnerships visible on the site.**
6. **No mention of insurance terms publicly** — only “Mūsų batutai drausti. Normalaus naudojimo žala — mūsų atsakomybė.” in the chatbot’s FAQ #7.
7. **Pricing model is opaque even to the design system.** No internal price list found in the repo. Design must continue to hide pricing.
8. **The current ai-logo-*.svg** is a Zyro AI-generated mark, not a designed wordmark. A real wordmark is the most-impactful brand artifact missing.

16. Full website crawl (added — all 7 pages)

All 7 public pages of `batutynas.lt` fetched and parsed. Files cached at `/tmp/bat-*.html` (1.6 MB total). Screenshots at `docs/screenshots/` (13 files, desktop + mobile, 21 MB total). Page-by-page evidence below.

16.1 Homepage /

- **Hero treatment (visually confirmed via screenshot):** Vibrant **purple** background, NOT the dark navy `#18172A` I assumed in §4.1 from inline CSS. The navy is used on one dark band only. The dominant hero is a saturated purple in the `#7C3AED` – `#8B5CF6` range.
- **H1:** “Pramogos be ribų – nuo kiemo iki miesto” — white on purple, all caps.
- **Three service cards** (visually centered, photo-first):
 - PRIVAČIOS ŠVENTĖS → yellow pill CTA, photo of inflatable + child
 - VIEŠI RENGINIAI → yellow pill CTA, photo of larger park
 - BATUTŲ PARDUOTUVĖ → yellow pill CTA, photo of equipment
- **Social icons in header:** Facebook, Instagram, TikTok, YouTube (4 platforms visible in nav bar).
- **Logo wordmark:** “BATUTYNAS.LT” with a small playful inflatable-arch icon left of text. White on purple.
- **CTAs persistent in nav:** yellow pill “☎ +370 648 803 88” (top-right).

16.2 /viesi-renginiai (Public events)

- **H1:** “MŪSŲ PRAMOGŲ ARSENALAS” (Our entertainment arsenal) — magenta gradient pill banner.
- **H4 section dividers** group equipment: *Didieji batutų parkai · Kliūčių ruožai · Dviejų dalių batutai · Kompaktiški žaidimų centrai · Azarto ir iššūkių žaidimai · Pramogų priedai*

- **Equipment H5 names (verbatim from H tags):** Fantazijų parkas · Džiumandži parkas · Mega ruožas · Giga ruožas · Mega raketa · Mega ufonautai · Mega waikiki · Monstrai · Chameleonas · Candy Pop · Aštuonkojis · Vienaragiai · Gigantiškas dart · Kamuolių medžioklė · Rodeo bulius · Saldesių aparatai · Efektų ir šou arsenalas · Komforto ir erdvės bazė.
- **Note on naming:** Site says "Mega raketa" (Lithuanian) — chatbot prompt says "Mega Rocket" (English). Resolve to one canonical form in design system. **Recommendation: use Lithuanian on customer surfaces ("Mega raketa"), keep English in admin if needed.**
- **Three value tiles (after equipment):** *Viskas iš vienos rankų · Individualus pritaikymas · Patirtis, nepaliekanti vietos klaidoms* — same "Kodėl rinktis BATUTYNAS.LT?" pattern as private page.
- **Body proof points (verbatim):**

"Visa mūsų įranga atitinka griežtus EN14960 saugumo standartus..." "Garantuojame visišką energetinę laisvę – pasitelkę galingus ilgalaikių partnerių generatorius, pramogas įrengiame bet kurioje vietoje." "Turimas nuosavas transportas ir 10 metų patirtis logistikos srityje leidžia užtikrinti, kad įranga renginio vietoje bus pristatyta bei sumontuota laiku ir kokybiškai."

16.3 /batutai–privacioms–sventems (Private parties)

- **H1:** "JŪSŲ KIEMO ŠVENTĖ BE RŪPESČIŲ: NUO BATUTO IKI KĖDĖS" (Your backyard party stress-free — from trampoline to chair).
- **4 product groups (H6):** Įranga triukšmingam vakarėliui · Banketiniai baldai · Saldesių aparatai · Batutai + Dovana
- **3 reasons-why pillars (H5):** WOW EFEKTAS · Nauji ir saugūs batutai · Pilnas servisas
- **Critical numeric claim (verbatim):** *"net 7 iš 13 mūsų batutų yra pagaminti 2026 metais, o likę – 2025 m."* — implies fleet is **13 inflatables** (not 18). The chatbot prompt lists 18, of which several are addons (Dart, Rodeo, etc) — reconcile in design system. **Recommendation: distinguish "batutai" (13) from "atrakcijos / priedai" (5 add-on attractions) in catalog UI.**
- **Body proof points (verbatim):**

"Mūsų batutai tampa ryškiausiu kiekvieno gimtadienio centru. Tai daugiau nei pramoga – tai viso rajono įvykis, sukuriantis nepamirštamą įspūdį ne tik Jūsų svečiams, bet ir visiems kaimynams." "Mes viskuo pasirūpiname patys: nuo saugaus atvežimo ir sumontavimo iki surinkimo po šventės. Turime spec. vežimėlius ir elektros ilgtinuvus, tad batutą pastatysime net ten, kur sunku privažiuoti..."

16.4 /batutai–parduotuve (Shop / B2B)

- **H1:** "PROFESIONALUS SPRENDIMAS JŪSŲ VERSLUI AR KIEMUI"
- **6 product categories (H5):** Čiuožyklos · Kompaktiškos žaidimų aikštelės · Kliūčių ruožai · 2-jų dalių batutai · Pripučiami žaidimai · Individuali gamyba.
- **New service line discovered: Batutų remontas (Repair)** — H3 with 3 service subcategories:
 - Siūlių ir paviršių remontas (seam + surface repair)
 - Detalių ir priedų priežiūra (parts maintenance)
 - Konstrukcinis atstatymas ir saugumas (structural rebuild + safety)
- **Catalog claim:** *"500+ batutų modelių · Tikslus išmatavimus ir techninius duomenis · Realias produktų nuotraukas · Modelius verslui ir privatiems klientams"* — i.e. a 500-model catalog is offered via email, NOT shown on the site itself. Catalog is delivered as a PDF.

- **Implication for design system:** Shop page is a lead-gen funnel, not an e-commerce catalog. The chatbot's [PURCHASE_EMAIL_INPUT] flow is the conversion path. No shopping cart, no public prices.

16.5 /batutu-nuoma-duk (FAQ)

10 FAQ items as H6, each with a paragraph answer. Key new evidence:

- **Price floor contradiction!** Site DUK says *"Batutų nuoma prasideda nuo 50 Eur už visą dieną"* — chatbot system prompt (prompts/chat-system-prompt.md line 10) says *"kainos prasideda nuo 30 €"*. **Action: pick one; recommend 50 € to match the customer-facing site.**
- **Weather policy (verbatim, more detailed than chatbot version):** *"Jei prognozė (meteo.lt) rodo lietu ar stiprų vėją (nuo 10 m/s), Jūsų prašymu rezervaciją perkelsime ar atšauksime nemokamai be jokių neigiamų pasekmių."*
- **Capacity claim:** *"vienu metu ant batuto gali būti nuo 100 iki 600 kg bendro svorio"*
- **24-hour response SLA stated:** *"Atsakome ir preliminarų pasiūlymą pateikiame per 24 valandas"* — design system should surface this on every form (*"Atsakysime per 24 val."*).
- **Closing dual CTA on every page (H5 pair):** *"Užpildykite užklausą ir gaukite asmeninį pasiūlymą"* + *"Nenorite laukti? Skambinkite tiesiogiai – patarsime ir paskaičiuosime kainą telefonu"* — form path AND phone path always offered together.

16.6 /pripuciamu-batutu-nuoma-saugumas (Safety)

- **H1:** "Saugumas" (Safety — single word).
- Page body is image-heavy (probably infographic/safety rules visual cards) — minimal extractable text. Worth a manual designer review of the screenshot before redesigning.

16.7 /pripuciamu-batutu-nuoma-apie-mus (About us)

The richest brand-voice page on the entire site. Designers should treat this as primary brand-voice source.

- **H1:** *"APIE MUS: Batutynas.lt – Jūsų šventės emocijų architektai!"* — **"emocijų architektai"** (emotion architects) is the brand's self-descriptor.
- **Mission quote (golden — should be permanent brand asset):**

"Mes nesiekiame tiesiog pristatyti batuto. Mes siekiame viršyti Jūsų lūkesčius ir sukurti erdvę, kurioje gimsta geriausi vaikystės prisiminimai." (We don't aim to merely deliver a trampoline. We aim to exceed your expectations and create the space where the best childhood memories are born.)

- **"5 auksinės taisyklės" (5 golden rules) — heavy emoji formatting on site (verbatim):**

🛡️ **Saugumas be kompromisų:** Visi mūsų batutai atitinka griežčiausius ES saugumo standartus (EN14960). Kiekviena pramoga po naudojimo yra kruopščiai valoma ir tikrinama. 🚀 **Nuolatinė inovacija:** Mes nemiegame žiemos miegu! 2025/2026 m. sezoną pasitinkame su revoliucinėmis naujienomis... ☀️ **Nulinė rizika dėl oro:** Esame lankstūs. Jei šventės dieną prognozuojamas stiprus lietus ar audra – rezervaciją perkeliame arba atšaukiame nemokamai. 📍 **Vietinis pasiekiamumas:** Esame Jūsų kaimynai. Greitai ir operatyviai aptarnaujame Tauragę, Šilutę, Jurbarką, Pagėgius, Kelmę... 🎁 **Pilnas emocijų paketas:** Nuo milžiniškų kliūčių ruožų ir putų šou iki saldėsių aparatų bei galingos garso įrangos triukšmingiems vakarėliams.

- **Other voice gems:**

"Mūsų komanda – Jūsų šventės partneriai 🤖" "Feel free..." (literal English phrase mixed in — note: minor brand-voice inconsistency) "Jūs patikite mums savo vaikų džiaugsmą ir saugumą" (You trust us with your children's joy and safety.)

- **Photo on this page:** A real photo of (presumably) the owner — a man in a hoodie, daylight, candid pose. This is the only "team photo" on the entire site. The site implies a team ("Mūsų komanda") but operationally is a solo owner with seasonal helpers — design should not invent fictional team members.

17. Brand-voice updates (additions from full crawl)

Adding to §2 above — the About page revealed three more brand-voice elements not in the homepage:

New canonical descriptors (use sparingly, with intent)

- **"emocijų architektai"** (emotion architects) — self-descriptor. Use as a tagline or hero subhead, not in body copy.
- **"5 auksinės taisyklės"** (5 golden rules) — frame for the brand's commitments. Reuse this structure on safety/about pages.
- **"Esame Jūsų kaimynai"** (We are your neighbors) — local/family business positioning.
- **"Mes nemiegame žiemos miegu"** (We don't hibernate in winter) — anti-seasonal claim, voice-of-founder energy.

Emoji usage on About page — clarifies the rule from §8

The About page uses semantic emoji as **leading bullets** for the 5 golden rules (🛡️ 🚀 ☀️ 📍 🔍). This is the only page where emoji are decorative-AND-semantic. **Design system rule update:** emoji as bullet-icons for value props is acceptable IF used as a consistent set within a list. Random emoji sprinkled in body copy is not.

Voice-rule update

- **Mixed-language tag:** The About page contains the English phrase *"Feel free"* mid-Lithuanian. Treat as a typo to clean up, not a brand pattern.
- **All-caps usage:** All H1 + value-prop headings on site are ALL CAPS Lithuanian. Body is sentence-case. This is consistent across all 7 pages.

18. Visual identity update (correcting §4.1)

Visual screenshots confirm a different palette than the inline CSS suggested. Resolving:

Marketing site — corrected palette (visually verified, May 2026)

Token	Value	Where it appears
Hero bg	Saturated purple ~ #6B21A8 – #7C3AED	Homepage hero, page H1 banners (as a magenta gradient pill)
Nav bg	Same purple, darker	Top sticky nav across all pages
Page body bg	White #FFFFFF	All content sections
CTA pill	Yellow #FACC15 – #FBBF24 (amber)	“Plačiau”, phone CTA, equipment-card buttons
Section title pill	Magenta-pink gradient #D946EF → #A855F7	Used for H1 banners and “Kodėl rinktis...”
Body text	Near-black #1F2937	Paragraphs, lists
Subhead	Mid-gray #4B5563	Card body text, captions

Reconciling with chatbot palette (§4.2)

The marketing site’s **purple + yellow** pair is already conceptually aligned with the chatbot’s **violet #7C3AED + amber #FBBF24**. The chatbot was built with the right colors — they just need to be officially confirmed as the master brand palette.

Recommendation for new design system:

- `brand.primary` = #7C3AED (violet — used on chatbot, marketing nav, marketing hero)
- `brand.accent` = #FBBF24 (amber — used as CTA pill on marketing, badges on chatbot)
- `brand.banner` = `linear-gradient(90deg, #D946EF, #A855F7)` (magenta-purple gradient — for H1 banner pills on marketing)
- `brand.surface` = #FFFFFF (default page bg)
- `brand.deep` = #18172A (used sparingly — only on the one dark band in homepage)

Override §6 table where it conflicts.

19. Screenshot inventory

13 screenshots captured via headless Chrome (1440×3500 desktop, 390×4000 mobile). Stored at `docs/screenshots/` :

File	Size	What it shows
desktop-home.png	1.7 MB	Homepage hero, 3 service cards, value pillars, equipment band, lead capture, footer
desktop-viesi.png	3.9 MB	Full equipment catalog with photos, capacity claims, value pillars
desktop-privatu.png	3.1 MB	Private events offering, 4 product categories, 3 reasons-why
desktop-parduotuve.png	3.2 MB	Shop landing, 6 categories, repair service, 500+ catalog promise
desktop-duk.png	1.0 MB	10 FAQ items with prices, weather policy, capacity
desktop-saugumas.png	1.1 MB	Safety page (image-heavy, manual review recommended)
desktop-apie.png	1.1 MB	About page with mission quote, 5 golden rules, owner photo
mobile-*.png (6 files)	408 KB–1.5 MB	390 px mobile renders of all pages except saugumas

Use: Pass these directly to Claude Design (or any designer) alongside this doc. They are the source of truth for current visual treatment.

20. Public-info inventory checklist (95% target)

Source	Status	Coverage
Website homepage	✓ HTML + screenshot	100%
Website /viesi-renginiai	✓ HTML + screenshot	100%
Website /batutai-privacioms-sventems	✓ HTML + screenshot	100%
Website /batutai-parduotuve	✓ HTML + screenshot	100%
Website /batutu-nuoma-duk	✓ HTML + screenshot	100%
Website /pripuciamu-batutu-nuoma-saugumas	✓ HTML + screenshot	100% (visual review still pending)
Website /pripuciamu-batutu-nuoma-apie-mus	✓ HTML + screenshot	100%
Website /privatumo-politika	⦿ Discovered, not fetched	Skip (legal boilerplate)
Facebook page <code>batutynas.taurage</code>	⚠ Auth-walled	Captions + visuals unreadable without login
Instagram <code>@batutynas</code>	⚠ Auth-walled	Profile bio unreadable without login
TikTok account	⦿ Icon found in nav, profile not crawled	Manual screenshot needed
YouTube channel	⦿ Icon found in nav, channel not crawled	Manual screenshot needed
Google Maps listing	⦿ Not crawled	Owner can pull rating + reviews
Repository artifacts (chatbot, dashboard, prompts)	✓ Read	100%
Internal: SAVININKUI.md	✓ Read	100%
Internal: design_guidelines.json	✓ Read	100%
Equipment catalog (18 named items + specs)	✓ Extracted	100%

Coverage estimate: ~92% of publicly-accessible Batutynas info captured. The 8% gap is the social-media auth wall (FB/IG/TikTok/YouTube) which cannot be programmatically scraped without login. To close it, the owner can either:

- Log in once and screenshot the Facebook business page, Instagram grid + Reels, TikTok profile, YouTube channel, then save to `docs/screenshots/social/`.
- Or share login (NOT recommended for security).

21. Contradictions found (designer must resolve)

While crawling, I found three places where the site contradicts itself or the chatbot. Flag these to the owner before designing:

1. **Price floor:** Site says "nuo 50 €", chatbot says "nuo 30 €". → Recommend 50 €.
 2. **Fleet size:** Site says "13 mūsų batutų" (Private page), chatbot lists 18 items. → 13 batutai + 5 atrakijų (addons). Make the distinction explicit in catalog UI.
 3. **Equipment naming:** Site uses Lithuanian ("Mega raketa"), chatbot uses English ("Mega Rocket"). → Use Lithuanian customer-side, English admin-side optional.
 4. **Team:** About page says "Mūsų komanda", reality is solo owner + seasonal helpers. → Photos and copy should imply solo-founder authenticity, not invent a multi-person team.
 5. **"Feel free"** typo on About page — mixed-language word in otherwise Lithuanian copy. Clean up.
-

End of evidence-collected design-system inputs. Every claim above is backed by a file path, live URL, or screenshot. No invented brand attributes. Public-info coverage ~92%.
